## Learn tmux (Part 5) – How to Customize tmux and Make It Your Own!

2023-08-19

If you want to increase your productivity with the Linux command line, tmux is definitely a great way to do just that! With tmux, you can manage your workflow with sessions, multitask with panes, and it also allows you to easily regain access to existing sessions when your SSH connection drops. In this five part series, you'll learn everything you need to know in order to use tmux daily! In this episode, we'll customize tmux and make it our own!

### .tmux.conf

```
# Initial setup
set -g default-terminal xterm-256color
set -g status-keys vi

# use C-j and C-f for the prefix.
set-option -g prefix C-j
set-option -g prefix2 C-f
unbind-key C-j
bind-key C-j send-prefix
set -g base-index 1

# Use Alt-arrow keys without prefix key to switch panes
bind -n M-Left select-pane -L
bind -n M-Right select-pane -R
bind -n M-Up select-pane -U
bind -n M-Down select-pane -D

# Set easier window split keys
bind-key v split-window -h
bind-key h split-window -v

# Shift arrow to switch windows
```

### New Book Coming Soon!

Linux is one of the best decisions you can make for your computer — but knowing where to start is the hard part. This guide walks you through everything: choosing a distribution, installing it, and using it confidently every day. It'll be released very soon!
